A world of fertility

Embryolab, a leading Fertility Clinic in Thessaloniki established in 2004, boasts a team of highly skilled doctors, embryologists, and scientists with extensive expertise in fertility.

- **Committed to excellence**, Embryolab offers fertility care, combining exceptional clinical experience with a state-of-the-art lab, equipped with cutting-edge technology.

- **We operate the next-generation In Vitro Fertilization (IVF)** Laboratory using Artificial Intelligence (AI) and timelapse technology to reduce time to pregnancy and increase success rates.

- **Our clinical focus is evidence based approaches** and personalized investigation and treatment planning for optimum outcome.

With respect to the dreams of people who wish to become parents, we offer **a comprehensive fertility experience**, up-to-date knowledge, many years of experience, and unlimited care!

Our mission is to support you on your fertility journey and help you build the family you dream of.

We are Embryolab and we advocate fertility for all.

A fertile world

Our goal is to effectively meet your needs. To harness knowledge and every new achievement in assisted reproduction and create the best prospects for your fertility and your future.

We share a common vision with each and every one of you. And through your successes, we create the next generation of Greece and the world.

Alexia Chatziparasidou
MSc, PMI-RMP, Consultant
Sr. Clinical Embryologist,
Embryolab Academy
Co-Founder and Director,
Co-Founder of Embryolab
Fertility Clinic

"20 Years of Creation!

Our heart beats in our laboratory, where little miracles happen every day. More than 12,000 children have taken their first steps there before reaching their parents' loving arms!

As a next-generation IVF laboratory, we are dedicated to creating a nurturing paradise for every embryo striving for excellence with passion and care!

At Embryolab, we trust science, embrace technology, and adopt innovative techniques to provide the best possible care and support to every woman and couple who trust us.

Our goal is to make dreams come true!"

Dr Nicholas K Christoforidis
MD, MSc, FRCOG
Consultant Obstetrician &
Gynaecologist,
Fertility Specialist,
Co-Founder,
Clinical & Scientific Director
of Embryolab Fertility Clinic

"At Embryolab, we celebrate 20 years of commitment and contribution to science and fertility care.

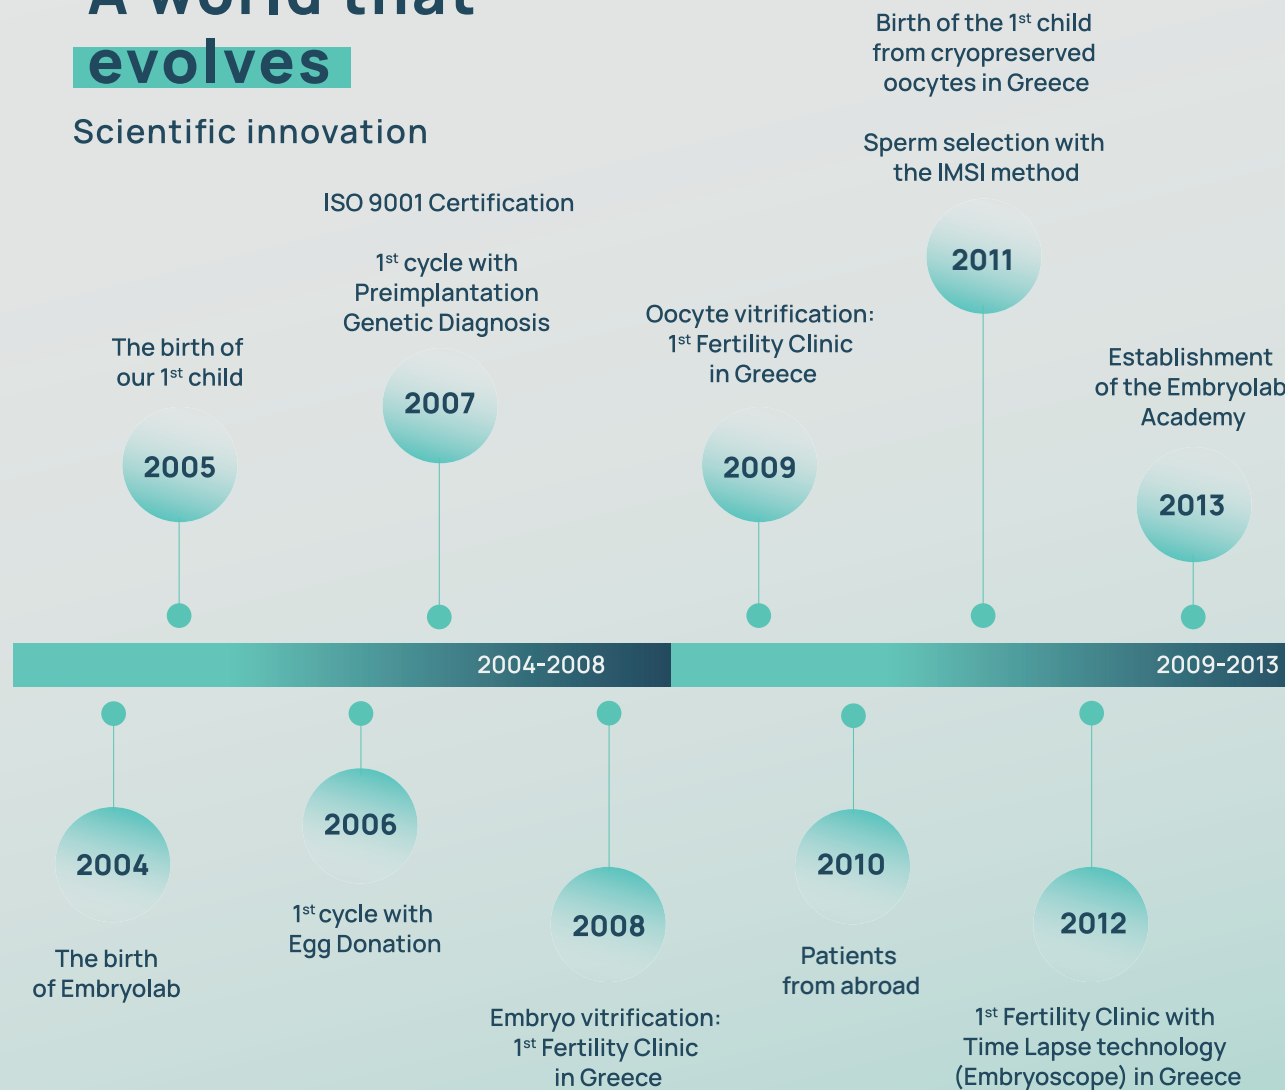

We are grateful for the thousands of babies born and the families created through our dedication and professional excellence. A heartfelt thank you to all who have trusted us on this journey, as well as to the incredible members of our team who made this possible.

Together, we continue to empower the dreams of those who wish to create their families, fully supporting the right to reproductive freedom and diversity."

A world of life. The world of Embryolab!

A world that evolves

Scientific innovation

A world ready for you to explore

Embryoscope

We monitor the development of your embryos in real time using timelapse technology, ensuring the best possible choices for the success of your treatment.

Artificial Intelligence (AI)

We apply artificial intelligence to analyze and select the optimal embryos with precision and efficiency, enhancing the chances of success.

Sustainable IVF

We are committed to implementing eco-friendly practices, reducing our carbon footprint, and applying sustainable solutions at every step of treatment.

My Embryolab App

An app that brings us closer, no matter where you are. Through the app, you have access to updates, schedules, and 24/7 support.

Cutting-Edge Technology

From managing genetic material to monitoring every stage of the treatment, we ensure that the most advanced solutions are at your fingertips.

A world of innovation

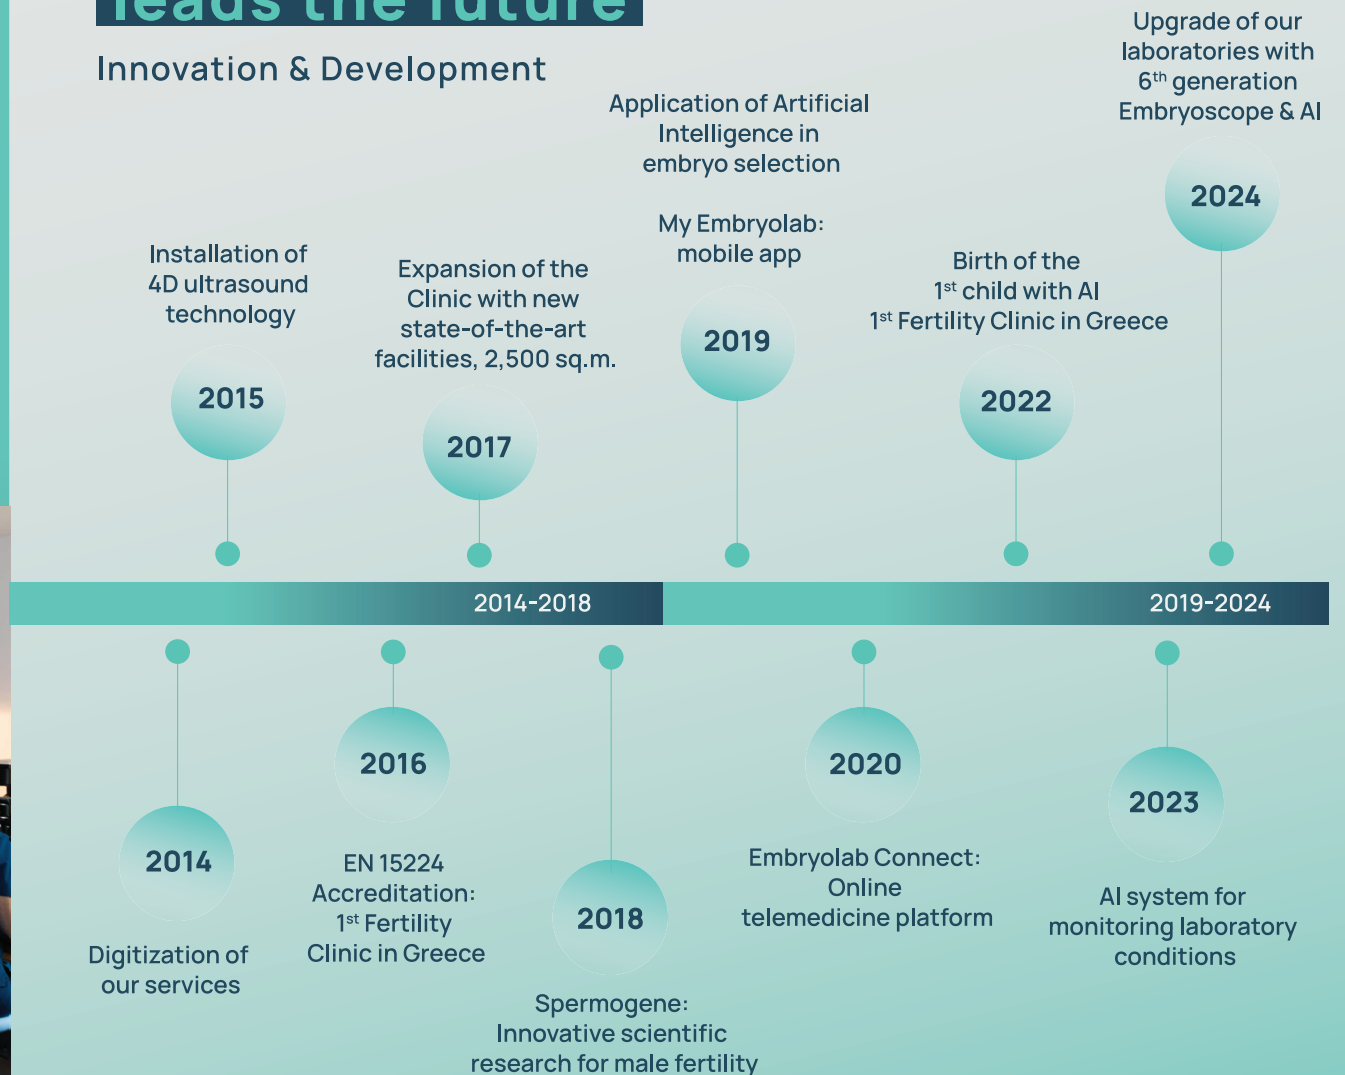

At Embryolab, innovation is not just a goal. It's our everyday reality. By using the most advanced technology, we are creating a new reality in the field of assisted reproduction. Through real-time communication, we support you at every step, no matter the distance.

From monitoring embryo development to providing personalized information through apps, we ensure that you are always at the center of the process.

A world that leads the future

Fertility Screening

Fertility screening is the first and essential step in understanding the factors that affect your reproductive health. We accurately assess your fertility, examine genetic and immunological factors, identify potential obstacles, and design the optimal strategy for you.

Fertility Treatments

We offer a wide range of fertility treatments, such as in vitro fertilization (IVF) and fertility preservation through egg and sperm freezing. We apply personalized protocols, utilizing cutting-edge technologies to ensure high success rates.

Laboratory Techniques

Our laboratory is a reference point for assisted reproduction. With time-lapse technology equipment, such as the embryoscope and timelapse technology, we monitor and select the best embryos. Additionally, with the help of artificial intelligence and preimplantation genetic testing (PGT), we ensure quality and safety at every step, creating ideal conditions for embryo development.

Fertility Care

At Embryolab, care goes beyond medical support. The services we offer include emotional support, counseling for stress management, and nutritional advice to enhance health and fertility. Our goal is to support every couple by providing a unique experience of comprehensive support and care.

A world of science and knowledge

Fertility Treatments & IVF Options

The IVF specialists at Embryolab, with scientific excellence, passion, and dedication, offer all assisted reproduction services and techniques in the most modern and comprehensive way.
